**DETAILED ACTION**

1. Claims 1-14 are presented for examination.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Tornabene et al U.S. PUB. No. (20020023132).

As claims 1,8-10, Tornabene et al teach a shared information processing system (fig. 1 and abstract) wherein a plurality of users (chat group members/users ¶ 0030 and 0058) can communicate simultaneously by the sharing of one of virtual chat rooms (hereinafter "channel") set up on a network user communicate simultaneously by a server and clients interconnected over said network (figs 2-3, login server 470 may implement one or more authorization procedures to enable simultaneous access to the OSP host complex 480 and the IM host complex 490, ¶ 0046 and 0056. See fig. 2 and 4), and the notifying of other clients of a chat character string inputted by a user through one said client (alerts and notification messages and are sent to group members ¶ 0059-0064, ¶ 0077 and ¶ 0083),

said client comprising highlighted file registration means for accepting from a user a request for registration of a highlighted file (automatically updated services provided to current members of the group (registered subscribers) include, providing a private group website, a list of current group members, a shared buddy list, shared member profiles, a private on-line forum for group members to chat with one another, a

shared list of favorite sites, a shared photo gallery, and/or any other type of shared data files (§ 0084 and § 0091. See also § 0057-0058 and § 0030 and 0070) and performing registration on a highlighted file list (selecting screen names of members to be invited by using mouse clicking § 0080-0085), and also notifying said server of registration information for said highlighted file § 0059-0060 and § 0080-0085);

----- highlighted file management means for acquiring information pertaining to said highlighted file through said server and managing the same (§ 0059-0062 and § 0080-0085); and

highlighted file status display means for displaying information pertaining to said highlighted file (A list of current group members may be displayed on the website or accessed by a hyperlink. The list also may indicate the online status of each group member § 0080-0085); and

said server comprising highlighted file table management means for managing highlighted file names registered to said each client using registration information about which notification has been given by the highlighted file registration means of said client (§ 0059-0062 and § 0080-0085 and § 0091); and

highlighted file information notification means for acquiring information pertaining to a highlighted file managed

Art Unit: 2153

by the highlighted file table management means (subscriber's profile data include, subscriber's buddy list, alert preferences requested by the subscriber, designated stocks and identified interests, ¶ 0063-0064 and ¶ 0080-0086); and

giving notification thereof to the client where the highlighted file is registered (alerts and notification messages and are sent to group members displayed on the list ¶ 0059-0064 , ¶ 0077 and ¶ 0083. see also ¶ 0096).

As claim 2, Tornabene et al teach the shared information processing system according to claim 1, wherein said highlighted file information notification means acquires basic information such as where said highlighted file is stored ¶ 0063-0064 and ¶ 0091-0092), and notifies said client thereof (¶ 0059-0064, ¶ 0077 and ¶ 0083. see also ¶ 0096).

As claim 3, Tornabene et al teach the shared information processing system according to claim 1, wherein said highlighted file information notification means acquires update information such as when and by whom said highlighted file was updated, and notifies said client thereof (¶ 0059-0064, ¶ 0077 and ¶ 0083-0084. see also ¶ 0096).

Art Unit: 2153

As claim 4, Tornabene et al teach the shared information processing system according to claim 1, wherein said server further comprises user information management means for acquiring user information about a user that has registered said highlighted file at said client, and notifies the administrator of said highlighted file of statistical information based on said user information (§ 0063-0064 and § 0072).

As claim 5, Tornabene et al teach a shared information processing system (fig. 1 and abstract) wherein a plurality of users (chat group members/users § 0030 and 0058) can communicate simultaneously by the sharing of one of virtual chat rooms (hereinafter "channel") set up on a network by a server and clients interconnected over said network, and the notifying of other clients of a chat character string inputted by a user through one said client (§ 0059-0064, § 0077 and § 0083-0085),

said server comprising highlighted file table management means for managing the correspondence between a channel and a highlighted file related to that channel (§ 0047-0048 and § 0057-0059); and

update information notification means for acquiring update information for said channel and updating information pertaining to the corresponding highlighted file, acquiring update

Art Unit: 2153

information for said highlighted file and updating information pertaining to the corresponding channel , and notifying each client of the update information (subscriber's profile data include, subscriber's buddy list, alert preferences requested by the subscriber, designated stocks, identified interests, and geographic location. ¶ 0063-0064 and ¶ 0080-0086); and

said client comprising highlighted file management means for acquiring information pertaining to a highlighted file related to said channel through the server and managing the same (¶ 0059-0062 and ¶ 0080-0085 and ¶ 0091-0096); and

highlighted file status display means for displaying information pertaining to said highlighted file (A list of current group members may be displayed on the website or accessed by a hyperlink. The list also may indicate the online status of each group member ¶ 0078 and ¶ 0080-0085).

As claim 6, Tornabene et al teach the shared information processing system according to claim 5, the server further comprising accessory part management means for managing the correspondence between accessory parts of a highlighted file related to a channel and accessory parts within a channel (¶ 0069-0072 and ¶ 0080-0085 and ¶ 0090); and

accessory part update information management means for

Art Unit: 2153

acquiring update information for accessory parts within said channel and updating information pertaining to accessory parts of the corresponding highlighted file, and acquiring update information for accessory parts within said highlighted file and updating information pertaining to accessory parts within the corresponding channel, and notifying said each client of said update information (§ 0059-0064 , § 0077 and § 0080-0085. see also § 0096).

As claim 7, Tornabene et al teach the shared information processing system wherein a plurality of users can communicate simultaneously by the sharing of one of virtual chat rooms (hereinafter "channel") set up on a network by a server and clients interconnected over said network, and the notifying of other clients of a chat character string inputted by a user through one said client, said client comprising highlighted file name extraction means for extracting file names that can be registered as highlighted files from a chat character string inputted by a user within a channel (§ 0048 and , § 0070. See also § 0059-0064, § 0077 and § 0083);

highlighted file registration determination means for determining whether or not a file corresponding to an extracted file name is to be registered as a highlighted file (§ 0048 and

Art Unit: 2153

¶ 0070. See also ¶ 0059-0064, ¶ 0077 and ¶ 0083);

highlighted file registration means for registering a highlighted file as related to the corresponding channel when the highlighted file registration determination means determines that a highlighted file is to be registered, and notifying said server of registration information for said highlighted file (automatically updated services provided to current members of the group (registered subscribers) include, providing a private group website, a list of current group members, a shared buddy list, shared member profiles, a private on-line forum for group members to chat with one another, a shared list of favorite sites, a shared photo gallery, and/or any other type of shared data files (¶ 0084 and ¶ 0091. See also ¶ 0057-0058 and ¶ 0030 and 0070);

highlighted file management means for acquiring information pertaining to said highlighted file through said server and managing the same (¶ 0059-0062 and ¶ 0080-0085); and

highlighted file status display means for displaying information pertaining to said highlighted file, and said server comprising highlighted file table management means for managing highlighted file names registered to said client using the registration information about which notification has been given by the highlighted file registration means of said client (¶

0078 and ¶ 0080-0085); and

highlighted file information notification means for acquiring information pertaining to a highlighted file managed by said highlighted file table management means, and giving notification thereof to the channel or the client where said highlighted file is registered (¶ 0057-0062 and ¶ 0080-0085 and ¶ 0091. See ¶ 0047-0048).
